

CENTRAL RADIO WORKSHOP

Directorate has a full fledged Radio Workshop for testing. Repairing and evaluating wireless equipments (HF/VHF/UHF) and accessories like Ni-CD/Ni-Mh/Secondary batteries, Battery Chargers, Antennas, Cables, Scramblers, Modems and Data Terminal Equipment etc. The Central Radio Workshop is fully equipped with latest Microprocessor controlled instruments and other electronic gadgets to handle all kinds of repair/evaluation jobs. In addition to the above the workshop also tests the wireless sets and accessories before they are issued on temporary loan to the States/CPMFs from the Reserve stocks and also when they are received back to ensure these items are in proper working condition.

Besides the above, the Radio Workshop also conducts acceptance/serviceability test of all technical stores procured by the Directorate.
