DCPW

1. **Utility Form Module Integration:**

- The existing Utility Page of the website should be copied and placed within the Employee Corner Module as a page, without creating any new URLs.

2. **Change Password Functionality:**

- A feature for changing the password should be implemented, where fields for the old password, new password, and confirm new password are provided.

3. **Edit Profile Enhancement:**

- The "Edit Profile" section should display all employee fields, including *Place of Posting*, *Station*, and *Designation*.

4. **Priority for Important Notifications:**

- Any new important notification should appear first in the list of notifications.

5. **Enhanced Search on Main Website:**

- The search functionality on the main department website should implement keyword-based searching. Even if only one word is typed, it should search through the website content, similar to the functionality on the CGHS website.

6. **Audit Trail Requirement**:
   In the audit trail, the system should capture and display the following information:

- Which **user** or **admin** performed the update.
- Details of the specific **module** that was updated.
- Comprehensive information about the changes made.

7. **Captcha Change Requirement**:
   The client is requesting that the captcha be changed to make it easier for users.

DCA

1. **Feedback Form Warning Message:**

   o The warning message on the Feedback Form of the DCA website needs to be translated into Hindi.

2. **Separate Tables in Whos Who Section:**

   o In the "Whos Who" section, there should be two separate tables specifically for the *Minister of State for Consumer Affairs, Food & Public Distribution*.
